WORK EXPERIENCE

Outlandish (TikTok Shop Agency) — Sep 2025 - Present

Senior Data Analyst - AI Development Team — *San Francisco Bay Area*

- **Many hats at a startup:** on the AI Development Team of a fast-moving agency serving 300+ TikTok Shop brands, I wear many hats across engineering, product, data, and user support, shipping 1,600+ merged pull requests to production in 7 months (Laravel/React internal platform and its AI agent console) through AI-assisted development with engineering review.
- **Data infrastructure:** replaced account executives' manual GMV and ad-spend tracking with automated TikTok API feeds and 60+ validation workflows, establishing the company's single source of truth: ~250 hours of manual work eliminated per month and frontline data accuracy up from ~70% to 97%.
- **Internal products:** built the 0-to-1 creator CRM that became the operating backbone for account and ops teams across 70,000+ creators; launched an AI planning tool that cut monthly brand planning from ~1 month to 7 days, piloting with account managers before rolling out company-wide; shipped self-serve report editing after spotting 5 of 30 users filing the same request, driving that category to zero.
- **AI agents:** built production agents that run daily operations: a meeting pipeline turning client meetings into LLM-extracted summaries and auto-assigned Lark tasks, BD lead intake with self-updating claim cards, and creator outreach with server-verified human approvals; the agent fleet is projected to raise account manager capacity from 1-2 shops to 6-7.
- **Operations & support:** serve as final resolution point for 10-30 daily tool and data requests and deliver SOPs, user guides, and training across BD, Operations, Legal, Finance, and US/UK teams; when a 5,000-person creator event's manual tier verification collapsed (3,000+ record backlog, 20+ support tickets), automated it with webhooks, TikTok API, and AI-vision checks, cutting check-in from 4 hours to 20 minutes.

IntelliPro Group — May 2025 - Sep 2025

Product Manager Intern - AI Sourcing — *San Francisco Bay Area*

- **0-to-1 AI sourcing tool:** designed and drove an AI candidate-sourcing tool (raw job description to ranked LinkedIn shortlist), piloted inside IntelliPro's ATS with working recruiters; built with a three-engineer team, reporting to the CTO and CEO.
- **LLM evaluation:** defined evaluation standards for LLM output quality: a weighted six-dimension scoring rubric and golden-standard labeled sets, reaching ~94% nDCG@30 and 98%+ overlap against recruiters' manual top-30 ranking; benchmarked 8+ LLMs on quality vs. cost.

TikTok — Jan 2024 - Jun 2024

Product Manager Intern - Effect Creation Tools Team — *Shanghai*

- **0-to-1 product launch:** spearheaded TikTok's next-gen effect asset library, launching 4,000+ categorized assets with engineering, design, ops, QA, and legal, increasing submission penetration by 38% and per-user content creation by 55%.
- **Pipeline diagnosis at scale:** unblocked TikTok's top-priority effect migration pipeline after 6+ months of failure, diagnosing root issues across ETL, QA, and ML filters; rebuilt logic with engineering and scaled throughput 400x, restoring effect supply to the recommendation system.

TikTok — Aug 2023 - Jan 2024

Data Analyst Intern - Music User Product Team — *Shanghai*

- **Data insights & self-service dashboards:** analyzed 5M+ playlist records with SQL and Python, delivering weekly insights that cut curation time from 4 days to 2 and drove an 18% increase in Weekly Active Users; built self-service Tableau dashboards for editorial KPIs, reducing ad-hoc data requests by 70%.

ByteDance — Jan 2023 - Aug 2023

Product Operation Intern - Photo & Text Community Team — *Shanghai*

- **Creator growth & governance:** launched growth initiatives (traffic support, creator education, submission campaigns) targeting creators identified via a standardized evaluation system, lifting submission frequency 10% and vertical views 7%; built governance flagging on moderation data, cutting high-risk content exposure 12%.

SKILLS

- **AI & Automation**: AI Agent Development & Operations, LLM Workflow Automation, Prompt Engineering, LLM Evaluation (rubrics, golden-standard sets), RAG, AI Vision, AI-assisted Coding (Claude)
- **Internal Tools & Product**: Workflow Automation, REST APIs & Webhooks, Lark/Feishu Open API, Engineering-ready Spec Writing, Roadmap Prioritization, SOP Development, Issue Triage & Ticket Deflection, User Training & Enablement
- **Data & Analytics**: SQL (joins, CTEs, window functions), Python (pandas, numpy), Excel, Tableau, Power BI, BigQuery, Snowflake, KPI Definition, Data Validation & QA Sampling, A/B Testing
- **Languages**: English (fluent), Mandarin Chinese (native)

EDUCATION

University of Arizona — May 2025

Master of Science, Business Analytics

Shanghai Business School — Jun 2024

Bachelor of Management, Business Administration

Shanghai University of Finance and Economics — Jun 2023

Exchange Program, Business Administration
