SUMMARY

User- and product-operations professional with mobile-video platform experience at TikTok, ByteDance, and a TikTok Shop agency, where I build internal platforms, support their users end to end — responding in minutes, resolving most issues the same day, turning recurring ones into permanent fixes — and automate operations with AI (LLM pipelines, triage tools). Hands-on with SQL (joins, CTEs, window functions), Excel, and Python (pandas, numpy); experienced in QA sampling, metrics consolidation, and dashboard construction. Fluent English and native Chinese for cross-regional collaboration.

WORK EXPERIENCE

Outlandish (TikTok Shop Agency) | Senior Data Analyst, Platform & User Operations Sep 2025 – Present

- **Frontline user support:** built and operate the company's internal platforms (Creator CRM for 44,000+ creators, AI planning tool for 300+ brands) and serve as their final resolution point — handle 10–30 inquiries daily from internal teams, brands, and creators via internal platforms and IM chat (data discrepancies, permissions, tool errors, how-to); respond in minutes, resolve most same day, follow up to confirm, and escalate when needed; recognized by users and leadership for responsiveness.
- **Recurring issues → permanent fixes:** analyze ticket patterns and automate the top categories — replaced manual GMV/Ads Spend/AOV tracking with TikTok API feeds, eliminating an entire error class and ~250 hours/month; shipped self-service report editing after 5 of 30 users raised the same request; rebuilt event creator tiering (3,000+ backlog, 20+ tickets) with TikTok API automation, cutting check-in for 5,000+ creators from 4 hours to 20 minutes.
- **User-data-driven product optimization:** consolidate metrics into the company's single source of truth with QA sampling and data-validation checks, powering daily reporting, role-based dashboards, and client-facing monthly benchmarks across US/UK markets; analyze tool-usage data and user feedback to identify product gaps and prioritize each iteration of the internal platforms.
- **AI-native automation:** shipped a fully automated AI pipeline turning every brand's weekly meetings into LLM-extracted summaries and assigned, due-dated Lark tasks, with daily status sync-back; built Lark Daily Digest for the C-suite (open-sourced: github.com/bellehe01/lark-daily-digest), an AI triage tool that classifies every group chat by urgency and surfaces key decisions and action items; plus LLM labeling and AI-vision parsing that automate support work.
- **Ticket deflection:** SOPs, user guides, and internal trainings for BD, Operations, Legal, Finance, and regional teams — enabling self-serve analytics and cutting repeat inquiries.

TikTok | Product Manager Intern, Effect Creation Tools Team Jan 2024 – Jun 2024

- Diagnosed failure points across QA, ETL, and model filters to unblock a high-priority effect migration pipeline; partnered with engineering to restructure the data flow, scaling throughput 400x and restoring effect supply for recommendations.
- Launched TikTok's next-gen effect asset library (4,000+ categorized assets) with engineering, design, ops, QA, and legal; validated via creator interviews and A/B tests, lifting submission penetration 38% and per-user content creation 55%.

TikTok | Data Analyst Intern, Music User Product Team Aug 2023 – Jan 2024

- Queried and analyzed 5M+ playlist records using SQL and Python with profiling and validation checks; weekly insights to cross-regional editorial teams cut curation time from 4 days to 2 and drove an 18% increase in Weekly Active Users.
- Built self-service Tableau dashboards monitoring KPIs (playlist WAU, average streaming time) with drill-down interactions, improving real-time visibility and reducing ad-hoc data requests by 70%.

ByteDance | Product Operations Intern, Photo & Text Community Team Jan 2023 – Aug 2023

- Designed and iterated content governance systems for creator submissions, using historical moderation data and behavioral drop-off signals to proactively flag low-quality and policy-violating content, cutting high-risk exposure 12% and boosting platform trust metrics.

SKILLS

- **Operations & Support:** User & Product Operations, Technical Troubleshooting, Issue Triage & Escalation, Ticket Deflection, SOP & FAQ Development, Process Improvement & Automation, Content Governance, Cross-Functional Collaboration
- **Data & Analytics:** SQL (joins, CTEs, window functions), Excel (formulas, pivot tables), Python (pandas, numpy), QA Sampling & Data Validation, Metrics Consolidation, Dashboard Construction, KPI Definition, A/B Testing
- **Web & APIs:** HTML, JavaScript (working knowledge), REST APIs & Webhooks, HTTP
- **Platforms & Tools:** Lark/Feishu (incl. Open API integrations), Tableau, Power BI, BigQuery, Snowflake, Amplitude, Mixpanel
- **AI:** LLM Prompting, AI Agent Development, Retrieval-Augmented Generation (RAG), AI Vision Applications
- **Languages:** English (fluent), Chinese (native)

EDUCATION

University of Arizona — Master of Science, Business Analytics May 2025

- **Coursework (all A/A+):** Statistics, Python, Database, Econometrics, Data Mining, Data Visualization, Big Data, Enterprise AI

Shanghai Business School — Bachelor of Management, Business Administration Jun 2024

Shanghai University of Finance and Economics — Exchange Program, Business Administration Jun 2023
