SUMMARY

Creator-ecosystem operations professional with a strong data core: manages and grows a 44,000+ creator ecosystem at a TikTok Shop agency — segmentation and GMV tiering, creator education and training, campaign management, ROI analysis — with prior product-operations and product roles at ByteDance and TikTok. Knows the TikTok creator ecosystem from both the platform and agency side; strong SQL and Python; coordinates Product, Operations, Marketing, and Data teams across global markets.

WORK EXPERIENCE

Outlandish (TikTok Shop Agency) | *Senior Data Analyst & Product Builder, Creator Operations* Sep 2025 – Present

- Own creator-ecosystem operations for 44,000+ TikTok creators through a Creator CRM I launched from zero: onboarding, GMV-based tiering and segmentation, recruitment, video-performance tracking, and per-campaign profit (P&L) — the operating backbone for account and operations teams.
- Formulate data-driven growth strategies by creator segment and brand: designed an AI-guided planning tool that converts campaign performance data into each brand's monthly creator strategy and GMV targets, rolled out across 300+ brands and cutting planning cycles from ~1 month to 7 days.
- Built a creator recommendation engine (LLM pain-point tagging + GMV-weighted scoring) that matches proven creators to brands, replacing manual cross-channel search and converting one-off collaborations into repeat, long-term creator relationships.
- Directed creator-facing operations for the Social Commerce Festival, a live event connecting 5,000+ TikTok creators with brands: ran creator training and on-site support, and shipped the check-in and creator-tiering platform (TikTok API, Eventbrite webhooks, AI vision), cutting check-in queues from 4 hours to 20 minutes.
- Define success metrics and run ROI analysis for the creator business: built single-source-of-truth reporting and client-facing monthly benchmarks across US/UK markets with per-campaign P&L for post-campaign reviews; automated a ~250-hour/month reporting workflow into a daily pipeline.
- Coordinate directly with the C-suite and across BD, Operations, Legal, Finance, and regional teams; deliver role-based dashboards and internal analytics training.

TikTok | *Product Manager Intern, Effect Creation Tools Team* Jan 2024 – Jun 2024

- Translated creator feedback into product improvements as PMF owner of TikTok's next-gen effect asset library: ran creator interviews and A/B tests to refine the value proposition, launching 4,000+ categorized assets with engineering, design, ops, QA, and legal, lifting submission penetration 38% and per-user content creation 55%.
- Unblocked a high-priority effect migration pipeline by diagnosing failure points across QA, ETL, and model filters; restructured the data flow, scaling throughput 400x and restoring effect supply for recommendations.

TikTok | *Data Analyst Intern, Music User Product Team* Aug 2023 – Jan 2024

- Monitored content trends and the competitive landscape (Spotify, Apple Music) to drive localized "New Release" strategies across five markets; partnered with design on UI and content-placement iterations that produced a 20% CTR uplift and a 13% increase in average streaming time.
- Queried and analyzed 5M+ playlist records using SQL and Python; delivered weekly insights to cross-regional editorial teams, cutting curation time from 4 days to 2 and driving an 18% increase in Weekly Active Users.
- Built self-service Tableau dashboards monitoring KPIs (playlist WAU, streaming time), reducing ad-hoc data requests by 70%.

ByteDance | *Product Operations Intern, Photo & Text Community Team* Jan 2023 – Aug 2023

- Ran creator growth programs — traffic support, creator education, one-on-one coaching, and submission campaigns — targeting high-quality creators identified via a standardized evaluation system, lifting submission frequency 10% and vertical view volume 7%.
- Designed and iterated content governance systems using historical moderation data and behavioral drop-off signals to proactively flag low-quality and policy-violating content, cutting high-risk exposure 12% and boosting trust metrics.
- Led rollout of single-image submission templates with upstream teams (Xingtū, Camera, Main App); validated via A/B testing, improving submission penetration and contributing to a 7% increase in total content volume.

SKILLS

- **Creator Ecosystem & Operations:** Creator Segmentation & GMV Tiering, Creator Education & Training, Campaign Management, ROI Analysis & Post-Mortems, Creator Recruitment, Competitive & Trend Analysis, Cross-Functional Project Management
- **Analytics:** SQL (advanced), Python (pandas, numpy, matplotlib), Excel, R, KPI Definition, A/B Testing & Experimentation, Funnel & Cohort Analysis, Hypothesis Testing
- **Data & BI Tools:** BigQuery, Snowflake, Tableau, Power BI, Amplitude, Mixpanel, Data Pipelines, Data Validation & Profiling
- **AI & ML:** LLM Prompting, Retrieval-Augmented Generation (RAG), Embedding Search, AI Agent Development, AI Vision Applications
- **Languages:** English (fluent), Chinese (native)

EDUCATION

University of Arizona — *Master of Science, Business Analytics* May 2025

- **Coursework:** Statistics, Python, Database, Econometrics, Data Mining, Data Visualization, Big Data, Enterprise AI

Shanghai Business School — *Bachelor of Management, Business Administration* Jun 2024

Shanghai University of Finance and Economics — *Exchange Program, Business Administration* Jun 2023
