SUMMARY

Internal tools and data product builder at a TikTok Shop agency serving 300+ brands. My work is one chain: replace manual, error-prone reporting with trusted automated data, build the internal products that run on that data, then layer AI agents on top so the workflows run themselves. I ship all of it as production code (1,600+ merged pull requests in 7 months, AI-assisted and engineering-reviewed) and own adoption end to end, from intake and training to usage-driven iteration. Based in San Francisco.

WORK EXPERIENCE

Outlandish (TikTok Shop Agency) | ***Senior Data Analyst, AI Development Team*** **Sep 2025 – Present**

- **Step 1, trusted data:** replaced account executives' hand-copied GMV and ad-spend tracking with automated TikTok API feeds and 60+ validation automations, establishing the company's single source of truth: ~250 hours of manual work eliminated per month, frontline data accuracy up from ~70% to nearly 97%, and an entire class of reporting errors gone.
- **Step 2, products on that data:** built the 0-to-1 creator CRM that is now the operating backbone for account and ops teams across 70,000+ creators; an AI planning tool that cut monthly planning from ~1 month to 7 days (piloted with account managers, then company-wide); and the role-based dashboards and client-facing monthly benchmarks (US/UK) that leadership and clients work from.
- **Step 3, AI agents that run the workflows:** the company now operates a fleet of production AI agents that run client shops (creator outreach, customer service, ads), projected to lift account-manager capacity from 1-2 shops to 6-7. I shipped the human-approval rail at its core (every outbound creator message or sample approval carries the approving person's own chat message, verified server-side), plus BD lead intake that turns each lead into a self-updating Lark card with one-click claim, a meeting-operations pipeline (calendar discovery, LLM summaries, auto-assigned tasks), and a C-suite daily digest agent (open-sourced: github.com/bellehe01/lark-daily-digest).
- **Run it all like a product:** final resolution point for 10-30 tool and data requests daily; recurring-issue reviews feed the roadmap (5 of 30 users filed the same reporting request, so I shipped self-serve report editing and drove the category to zero); SOPs, user guides, and training for BD, Ops, Legal, Finance, and US/UK teams; make the build-direct vs. hand-off call explicitly (prototyped an LLM+RAG approach for two weeks, then chose a lightweight design that account managers actually adopted, lifting their capacity from 1 to 2-3 brands even before the agent fleet).

IntelliPro Group | ***Product Manager Intern, AI Sourcing*** **May 2025 – Sep 2025**

- **0-to-1 internal tool:** designed and drove an AI candidate-sourcing tool (raw job description to a ranked LinkedIn shortlist), piloted inside IntelliPro's ATS and tested by working recruiters; built with a three-engineer team, reporting directly to the CTO and CEO.
- **Defining metrics that stick:** defined what "good" means and made it measurable: a weighted six-dimension scoring rubric, golden-standard labeled sets built with cross-annotator reconciliation, and offline evaluations reaching ~94% nDCG@30 with 98%+ overlap against recruiters' manual top-30 ranking; benchmarked 8+ LLMs on quality vs. cost.

TikTok | ***Product Manager Intern, Effect Creation Tools Team*** **Jan 2024 – Jun 2024**

- Drove a 0-to-1 internal asset library (4,000+ categorized assets) launched with engineering, design, ops, QA, and legal, lifting submission penetration 38% and per-user content creation 55%; validated via A/B tests and user interviews.

TikTok | ***Data Analyst Intern, Music User Product Team*** **Aug 2023 – Jan 2024**

- Built the team's self-service Tableau dashboards and defined their metric conventions, cutting ad-hoc data requests by 70%; analyzed 5M+ playlist records with SQL and Python; weekly insights drove an 18% WAU increase and cut curation cycle time from 4 days to 2.

ByteDance | ***Product Operations Intern, Photo & Text Community Team*** **Jan 2023 – Aug 2023**

- Built a standardized creator-evaluation system and content-governance flagging on moderation data, cutting high-risk content exposure 12%.

SKILLS

- **Internal Tools & Automation:** Workflow Automation, REST APIs & Webhooks, AI-assisted Coding (Claude), Lark/Feishu Open API integrations (Calendar/VC/Tasks/IM), Engineering-ready Spec Writing, SOP Development, Issue Triage & Ticket Deflection
- **Data & Analytics:** SQL (joins, CTEs, window functions), Python (pandas, numpy), Excel, KPI Definition, Data Validation & QA Sampling, Dashboard Construction, Funnel & Cohort Analysis, A/B Testing
- **AI & LLM:** AI Agent Development & Operations, LLM Workflow Automation, Prompt Engineering, LLM Labeling & Categorization, LLM Evaluation (rubrics, golden-standard sets, nDCG), RAG, AI Vision, Model Selection & Cost Optimization
- **Tools:** BigQuery, Snowflake, Tableau, Power BI, Amplitude, Mixpanel; HTML/JavaScript (working knowledge)
- **Languages:** English (fluent), Chinese (native)

EDUCATION

University of Arizona — *Master of Science, Business Analytics* **May 2025**

- **Coursework (all A/A+):** Statistics, Python, Database, Econometrics, Data Mining, Data Visualization, Big Data, Enterprise AI

Shanghai Business School — *Bachelor of Management, Business Administration* **Jun 2024**

Shanghai University of Finance and Economics — *Exchange Program, Business Administration* **Jun 2023**
