## SUMMARY

Product operations builder at the intersection of AI, product, and operations: I identify operational pain points, turn them into AI-driven internal tools and repeatable methodologies, act as product owner for internal users, and own each rollout — training, documentation, adoption metrics. Shipped automations eliminating ~250 hours/month of manual work. Prior TikTok and ByteDance experience including data analytics on the TikTok Music team. Strong SQL; native Mandarin Chinese and fluent English, with daily experience bridging China-based and US/UK teams.

## WORK EXPERIENCE

### Outlandish (TikTok Shop Agency) | Senior Data Analyst, AI Development Team

Sep 2025 – Present

- **AI-powered productivity:** identify operational pain points and ship AI-driven solutions — a fully automated meeting pipeline (calendar discovery → LLM-extracted summaries and action items → auto-assigned Lark tasks with daily status sync-back) that replaced manual coordination; AI-vision verification that replaced manual data checks; and a RAG proposal assistant cutting drafting from ~2 hours to 15 minutes for the BD team (~5 proposals/week). Each solution is documented into SOPs and repeatable methodologies.
- **Product owner for internal users:** own the company's internal product portfolio used daily across 300+ brands and 44,000+ creators — a 0→1 creator CRM that became the operating backbone for account and ops teams, and an AI planning tool that cut the monthly planning cycle from ~1 month to 7 days (piloted with a few account managers, iterated on feedback, then rolled out company-wide); prioritize iterations from usage data and user feedback — e.g., spotted 5 of 30 users filing the same reporting request and shipped self-serve report editing that drove the category to zero.
- **Scalable operational infrastructure:** replaced error-prone manual GMV/ad-spend tracking with automated TikTok API data feeds into live dashboards, eliminating an entire error class and ~250 hours/month; when a 5,000-person creator event's manual tier-verification broke down (3,000+ backlog, 20+ tickets), rebuilt it as a webhook + API automated workflow — check-in cut from 4 hours to 20 minutes, ticket category eliminated.
- **Go-to-market & cross-functional delivery:** own every rollout end to end — training sessions, SOPs, user guides, and FAQs for BD, Operations, Legal, Finance, and US/UK regional teams; productized a C-suite AI briefing tool into a one-click installable team tool (open-sourced: [github.com/bellehe01/lark-daily-digest](https://github.com/bellehe01/lark-daily-digest)); handle 10–30 user inquiries daily as the final resolution point; work directly with the C-suite, bridging Chinese- and English-speaking teams daily.

### IntelliPro Group | Product Manager Intern, AI Sourcing

May 2025 – Sep 2025

- **0→1 AI product:** designed and drove an AI candidate-sourcing tool — raw job description to a ranked shortlist — piloted inside IntelliPro's ATS and tested by working recruiters; wrote the product requirements and scoring prompts, built with a three-engineer team, reporting directly to the CTO and CEO.
- **Making "good" measurable:** designed a weighted six-dimension evaluation rubric and golden-standard labeled sets with cross-annotator reconciliation; offline evaluations reached ~94% nDCG@30 with 98%+ overlap against recruiters' manual ranking; benchmarked 8+ LLMs on quality vs. cost (~\$4–8 per JD).

### TikTok | Data Analyst Intern, Music User Product Team

Aug 2023 – Jan 2024

- Supported TikTok Music's Global Programming Team (global and local editorial teams across the US, Brazil, Indonesia, Mexico, and Australia) as their data go-to: built self-service Tableau dashboards and defined the team's metric conventions, cutting ad-hoc data requests by 70%.
- Analyzed 5M+ playlist records with SQL/Python; weekly insights on market-level content divergence cut curation time from 4 days to 2 and drove an 18% increase in Weekly Active Users.

### TikTok | Product Manager Intern, Effect Creation Tools Team

Jan 2024 – Jun 2024

- Drove a 0→1 internal asset library (4,000+ categorized assets) launched with engineering, design, ops, QA, and legal — lifting submission penetration 38% and per-user content creation 55%.

### ByteDance | Product Operations Intern, Photo & Text Community Team

Jan 2023 – Aug 2023

- Built a standardized creator-evaluation system and content-governance flagging on moderation data, cutting high-risk content exposure 12%.

## SKILLS

- **AI & Automation:** AI Workflow Automation, AI Skill Development, Prompt Engineering, LLM Labeling & Categorization, RAG, AI Vision, LLM Evaluation (rubrics, golden-standard sets), Model Selection & Cost Optimization, AI-assisted Coding
- **Product Operations:** Internal Product Ownership, Requirements & Spec Writing (MRD/PRD), Roadmap Prioritization, Rollout & GTM for Internal Tools, User Training & Enablement, SOP & Documentation, Issue Triage & Ticket Deflection
- **Data & Analytics:** SQL (joins, CTEs, window functions), Python (pandas, numpy), Excel, KPI Definition, Adoption & Usage Analysis, Dashboard Construction (Tableau, Power BI), A/B Testing
- **Tools:** BigQuery, Snowflake, Lark/Feishu (incl. Open API integrations), Amplitude, Mixpanel, REST APIs & Webhooks
- **Languages:** Mandarin Chinese (native), English (fluent) — daily cross-country collaboration

## EDUCATION

### University of Arizona — Master of Science, Business Analytics

May 2025

- **Coursework (all A/A+):** Statistics, Python, Database, Econometrics, Data Mining, Data Visualization, Big Data, Enterprise AI

### Shanghai Business School — Bachelor of Management, Business Administration

Jun 2024

### Shanghai University of Finance and Economics — Exchange Program, Business Administration

Jun 2023
