SUMMARY

Product operations professional who operates internal data and analytics products — and the AI agents behind them — end to end: supporting users as the final resolution point (responding in minutes, resolving most issues same day), delivering training and instructional materials, investigating use cases from usage data, and turning recurring feedback into shipped product fixes. Prior TikTok, ByteDance, and Douyin-ecosystem experience across product operations and data analytics. Strong SQL, Excel, and Python; fluent English and native Chinese for cross-country collaboration with China-based and global teams.

WORK EXPERIENCE

Outlandish (TikTok Shop Agency) | *Senior Data Analyst, AI Development Team*

Sep 2025 – Present

- **Operate analytics products & support their users:** built and operate the company's internal data products (Creator CRM covering 44,000+ creators, AI planning tool used by teams serving 300+ brands, single-source-of-truth reporting layer) and serve as their final resolution point — handle 10–30 inquiries daily from internal teams and external brand/creator partners (data discrepancies, permissions, tool errors, how-to); respond in minutes, resolve most same day, escalate when needed; recognized by users and leadership for responsiveness.
- **Manage AI agents in production:** operate and iterate a portfolio of LLM agents used daily — an automated meeting pipeline (calendar discovery → LLM-extracted summaries and action items → auto-assigned Lark tasks with daily status sync-back), Lark Daily Digest for the C-suite (an AI triage agent classifying every group chat by urgency; open-sourced: github.com/bellehe01/lark-daily-digest), and a RAG proposal assistant used weekly by the BD team — monitoring usage, collecting feedback, and shipping fixes fast.
- **Training & enablement:** deliver internal training sessions and write SOPs, user guides, and FAQs for BD, Operations, Legal, Finance, and US/UK regional teams; built role-based dashboards that enable self-serve analytics — cutting repeat inquiries and ad-hoc requests.
- **Use-case investigation → product iteration:** analyze tool-usage data and recurring-issue patterns to find what users actually need — e.g., spotted 5 of 30 users filing the same reporting request and shipped self-serve report editing that drove the category to zero; automated manual GMV/ad-spend tracking with TikTok API feeds, eliminating an error class and ~250 hours/month.
- **Critical-issue response:** when a 5,000-person creator event's manual tier-verification broke down (3,000+ record backlog, 20+ support tickets), triaged and resolved complaints case by case, then automated the workflow with webhooks + TikTok API — check-in cut from 4 hours to 20 minutes and the ticket category eliminated.

TikTok | *Product Manager Intern, Effect Creation Tools Team*

Jan 2024 – Jun 2024

- Diagnosed failure points across QA, ETL, and model filters to unblock a high-priority effect migration pipeline; partnered with engineering to restructure the data flow, scaling throughput 400x and restoring effect supply for recommendations.
- Launched TikTok's next-gen effect asset library (4,000+ categorized assets) with engineering, design, ops, QA, and legal; validated via creator interviews and A/B tests, lifting submission penetration 38% and per-user content creation 55%.

TikTok | *Data Analyst Intern, Music User Product Team*

Aug 2023 – Jan 2024

- Built self-service Tableau dashboards monitoring KPIs (playlist WAU, average streaming time) with drill-down interactions and defined the team's metric conventions, cutting ad-hoc data requests by 70%; supported cross-regional editorial teams (US, Brazil, Indonesia, Mexico, Australia) as their data go-to.
- Queried and analyzed 5M+ playlist records using SQL and Python with profiling and validation checks; weekly insights cut curation time from 4 days to 2 and drove an 18% increase in Weekly Active Users.

ByteDance | *Product Operations Intern, Photo & Text Community Team*

Jan 2023 – Aug 2023

- Designed and iterated content governance systems for creator submissions, using historical moderation data and behavioral drop-off signals to proactively flag low-quality and policy-violating content, cutting high-risk exposure 12% and boosting platform trust metrics.

SKILLS

- **Product Operations & Support:** Product Operations, User Training & Enablement, SOP & FAQ Development, Technical Troubleshooting, Issue Triage & Escalation, Ticket Deflection, Process Improvement & Automation, Cross-Functional & Cross-Country Collaboration
- **Data & Analytics:** SQL (joins, CTEs, window functions), Excel (formulas, pivot tables), Python (pandas, numpy), QA Sampling & Data Validation, Metrics Consolidation, Dashboard Construction, KPI Definition, A/B Testing
- **AI:** AI Agent Operations & Development, LLM Prompting, LLM Labeling & Categorization, Retrieval-Augmented Generation (RAG), AI Vision Applications
- **Platforms & Tools:** Lark/Feishu (incl. Open API integrations), Tableau, Power BI, BigQuery, Snowflake, Amplitude, Mixpanel; REST APIs & Webhooks
- **Languages:** English (fluent), Chinese (native)

EDUCATION

University of Arizona — *Master of Science, Business Analytics*

May 2025

- **Coursework (all A/A+):** Statistics, Python, Database, Econometrics, Data Mining, Data Visualization, Big Data, Enterprise AI

Shanghai Business School — *Bachelor of Management, Business Administration*

Jun 2024

Shanghai University of Finance and Economics — *Exchange Program, Business Administration*

Jun 2023
