SUMMARY

User- and product-operations professional with mobile-video platform experience at TikTok, ByteDance, and a TikTok Shop agency, where I build internal platforms and support their users end to end — responding to inquiries in minutes, resolving most the same day, and turning recurring issues into permanent product fixes — plus training, QA sampling, data validation, metrics consolidation, and dashboard construction. Hands-on with SQL (joins, CTEs, window functions), Excel, and Python (pandas, numpy). Fluent English and native Chinese for cross-regional collaboration.

WORK EXPERIENCE

Outlandish (TikTok Shop Agency) | *Senior Data Analyst, Internal Product & User Operations* Sep 2025 – Present

- **Frontline user support:** built and operate the company's internal platforms (Creator CRM managing 44,000+ creators, AI-guided planning tool across 300+ brands, performance reporting) and serve as their final resolution point — handle 10–30 inquiries daily (data discrepancies, permissions, tool errors, how-to), responding within minutes and resolving the vast majority same day, following up to confirm resolution and escalating cross-team issues when needed; responsiveness repeatedly recognized by users and leadership.
- **Recurring issues → permanent fixes:** review inquiries regularly and turn the top categories into automation — replaced error-prone manual GMV/Ads Spend/AOV tracking with TikTok API feeds (eliminated a whole error class, ~250 hours/month); shipped self-service report editing after 5 of 30 users raised the same layout request; rebuilt an event creator-tiering flow (3,000+ creator backlog, 20+ support tickets over wrong tiers) with TikTok API auto-tiering, cutting a 5,000-creator event's check-in from 4 hours to 20 minutes.
- **User-data-driven product optimization:** consolidate metrics into the company's single source of truth with QA sampling and data-validation checks, powering role-based dashboards and client-facing monthly benchmarks across US/UK markets; analyze tool-usage data and user feedback to identify product gaps and prioritize each iteration of the internal platforms.
- **AI-native automation:** shipped a fully automated AI pipeline that turns every brand's weekly client meetings into LLM-extracted summaries and assigned, due-dated Lark tasks — no manual step from calendar to task, with completion status synced back daily; built Lark Daily Digest, an AI triage tool for the C-suite, open-sourced (github.com/bellehe01/lark-daily-digest), that classifies every group chat by urgency (red/yellow/green) each morning and surfaces key decisions and action items — plus LLM labeling/categorization and AI-vision parsing that automate manual support work.
- **Ticket deflection:** SOPs, user guides, and internal trainings for BD, Operations, Legal, Finance, and regional teams — enabling self-serve analytics and cutting repeat inquiries.

TikTok | *Product Manager Intern, Effect Creation Tools Team* Jan 2024 – Jun 2024

- Diagnosed failure points across QA, ETL, and model filters to unblock a high-priority effect migration pipeline; partnered with engineering to restructure the data flow, scaling throughput 400x and restoring effect supply for recommendations.
- Launched TikTok's next-gen effect asset library (4,000+ categorized assets) with engineering, design, ops, QA, and legal; validated via creator interviews and A/B tests, lifting submission penetration 38% and per-user content creation 55%.

TikTok | *Data Analyst Intern, Music User Product Team* Aug 2023 – Jan 2024

- Queried and analyzed 5M+ playlist records using SQL and Python with profiling and validation checks; weekly insights to cross-regional editorial teams cut curation time from 4 days to 2 and drove an 18% increase in Weekly Active Users.
- Built self-service Tableau dashboards monitoring KPIs (playlist WAU, average streaming time) with drill-down interactions, improving real-time visibility and reducing ad-hoc data requests by 70%.

ByteDance | *Product Operations Intern, Photo & Text Community Team* Jan 2023 – Aug 2023

- Designed and iterated content governance systems for creator submissions, using historical moderation data and behavioral drop-off signals to proactively flag low-quality and policy-violating content, cutting high-risk exposure 12% and boosting platform trust metrics.

SKILLS

- **Operations & Support:** User & Product Operations, Technical Troubleshooting, Issue Triage & Escalation, Ticket Deflection, SOP & FAQ Development, Process Improvement & Automation, Content Governance, Cross-Functional Collaboration
- **Data & Analytics:** SQL (joins, CTEs, window functions), Excel (formulas, pivot tables), Python (pandas, numpy), QA Sampling & Data Validation, Metrics Consolidation, Dashboard Construction, KPI Definition, A/B Testing
- **Platforms & Tools:** Tableau, Power BI, BigQuery, Snowflake, Amplitude, Mixpanel, Data Pipelines
- **AI:** LLM Prompting, AI Agent Development, Retrieval-Augmented Generation (RAG), AI Vision Applications
- **Languages:** English (fluent), Chinese (native)

EDUCATION

University of Arizona — *Master of Science, Business Analytics* May 2025

Shanghai Business School — *Bachelor of Management, Business Administration* Jun 2024

Shanghai University of Finance and Economics — *Exchange Program, Business Administration* Jun 2023
