SUMMARY

Product operations builder at the intersection of AI, product, and operations, with music as home ground: on the TikTok Music team I ran copyright and metadata operations (ISRC and rights verification against label deliveries, editorial playlist rights safeguards) and built the editorial team's data products. Outside work I'm a guitarist and an avid live-music and DSP user who follows the industry closely. Today I identify operational pain points, turn them into AI-driven internal tools and repeatable methodologies, act as product owner for internal users, and own each rollout with training, documentation, and adoption metrics; my automations eliminate ~250 hours of manual work per month. Strong SQL; native Mandarin Chinese and fluent English, bridging China-based and US/UK teams daily.

WORK EXPERIENCE

Outlandish (TikTok Shop Agency) | Senior Data Analyst, AI Development Team

Sep 2025 – Present

- **AI-powered productivity:** identify operational pain points and ship AI-driven solutions, including a fully automated meeting pipeline (calendar discovery, LLM-extracted summaries and action items, auto-assigned Lark tasks with daily status sync-back) that replaced manual coordination; AI-vision verification that replaced manual data checks; and a RAG proposal assistant that cut drafting from ~2 hours to 15 minutes for the BD team.
- **Product owner for internal users:** own the company's internal product portfolio used daily across 300+ brands and 70,000+ creators, including a 0-to-1 creator CRM that became the operating backbone for account and ops teams and an AI planning tool that cut the monthly planning cycle from ~1 month to 7 days (piloted with a few account managers, then rolled out company-wide). Prioritize iterations from usage data and feedback; for example, shipped self-serve report editing after 5 of 30 users filed the same request, driving that category to zero.
- **Scalable operational infrastructure:** replaced error-prone manual GMV/ad-spend tracking with automated TikTok API data feeds into live dashboards, eliminating an entire error class and ~250 hours of manual work per month, and automated recurring client-facing performance reports (monthly benchmarks across 300+ US/UK brands). When a 5,000-person creator event's manual tier-verification broke down (3,000+ backlog, 20+ tickets), rebuilt it as an automated webhook and API workflow, cutting check-in from 4 hours to 20 minutes and eliminating that ticket category.
- **Go-to-market & cross-functional delivery:** own every rollout end to end, delivering training sessions, SOPs, and user guides for BD, Operations, Legal, Finance, and US/UK regional teams; productized a C-suite AI briefing tool into a one-click installable team tool (open-sourced: github.com/bellehe01/lark-daily-digest); handle 10–30 user inquiries daily as the final resolution point, working directly with the C-suite.

TikTok | Product Manager Intern, Effect Creation Tools Team

Jan 2024 – Jun 2024

- **Pipeline diagnosis & systems:** diagnosed failure points across QA, ETL, and model filters to unblock a high-priority effect migration pipeline; partnered with engineering to restructure the data flow, scaling throughput 400x and restoring effect supply for recommendations.
- **0-to-1 internal tooling:** drove TikTok's next-gen effect asset library (4,000+ categorized assets) launched with engineering, design, ops, QA, and legal, lifting submission penetration 38% and per-user content creation 55%.

TikTok | Data Analyst Intern, Music User Product Team

Aug 2023 – Jan 2024

- **Copyright & metadata operations:** ran weekly metadata operations for new releases in the internal CMS, verifying ISRC, distributor, and release region against label delivery schedules with SQL, and enforcing rights safeguards during the UMG licensing transition by screening unlicensed tracks out of editorial playlists. Caught a major-artist album stuck in label ingestion and escalated it to BD; the album went live within hours, and my escalation protocol and metadata QA checklist were adopted, cutting similar errors by ~80%.
- **Editorial data products:** built self-service Tableau dashboards combining KPIs and metadata for global and local editorial teams, with training and help docs, cutting ad-hoc requests by 70%; SQL/Python analysis of 5M+ playlist records cut curation time from 4 days to 2 and lifted WAU 18%.

ByteDance | Product Operations Intern, Photo & Text Community Team

Jan 2023 – Aug 2023

- **Ops pain points to product tools:** ran vertical operations for Douyin's photo-and-text format, defining quality standards, screening 8,000+ creators into incentive campaigns, and running 1:1s with 20 top creators; turned their common blockers into product asks and shipped creation templates and posting tools with the product team, lifting target-vertical views 7% and quality creators' posting frequency 10%.
- **Content governance:** built a standardized creator-evaluation system and governance flagging on moderation data, cutting high-risk content exposure 12%.

SKILLS

- **AI & Automation:** AI Workflow Automation, AI Skill Development, Prompt Engineering, LLM Labeling & Categorization, RAG, AI Vision, LLM Evaluation (rubrics, golden-standard sets), Model Selection & Cost Optimization, AI-assisted Coding
- **Product Operations:** Internal Product Ownership, Requirements & Spec Writing (MRD/PRD), Rights & Metadata Operations (ISRC, label delivery QA), Roadmap Prioritization, Rollout & GTM for Internal Tools, User Training & Enablement, SOP & Documentation, Issue Triage
- **Data & Analytics:** SQL (joins, CTEs, window functions), Python (pandas, numpy), Excel, KPI Definition, Adoption & Usage Analysis, Tableau, Power BI, BigQuery, Snowflake, Lark/Feishu Open API, REST APIs & Webhooks, A/B Testing
- **Languages:** Mandarin Chinese (native), English (fluent); daily cross-country collaboration

EDUCATION

University of Arizona — Master of Science, Business Analytics

May 2025

- **Coursework (all A/A+):** Statistics, Python, Database, Econometrics, Data Mining, Data Visualization, Big Data, Enterprise AI

Shanghai Business School — Bachelor of Management, Business Administration

Jun 2024

Shanghai University of Finance and Economics — Exchange Program, Business Administration

Jun 2023
