## SUMMARY

User- and product-operations professional with mobile-video platform experience at TikTok, ByteDance, and a TikTok Shop agency, where I build internal platforms and support their users end to end — troubleshooting, training, QA sampling and data validation, metrics consolidation, and dashboard construction. Hands-on with SQL (joins, CTEs, window functions), Excel, and Python (pandas, numpy); partner closely with engineering to turn recurring user issues into product improvements. Fluent English and native Chinese for cross-regional collaboration.

## WORK EXPERIENCE

### Outlandish (TikTok Shop Agency) | Senior Data Analyst, Creator Operations & Internal Product Sep 2025 – Present

- Build and operate the company's internal platforms — a Creator CRM managing 44,000+ creators, an AI-guided planning tool used across 300+ brands, and the performance-reporting system — with AI tooling (LLM tagging, GMV-weighted scoring, AI-vision parsing) that automates manual operations work.
- Provide frontline user support for these platforms, handling 10–30 inquiries daily from internal teams (account managers, Operations, Finance) and external creator and brand partners across chat and internal channels: diagnose data and tooling issues, follow up to confirm resolution, and run regular reviews that turn recurring issues into workflow and product fixes.
- Deliver role-based dashboards and internal training for BD, Operations, Legal, Finance, and regional teams, enabling self-serve analytics and reducing repetitive inquiries; gather user feedback continuously and ship improvements.
- Consolidate metrics and construct dashboards as the company's single source of truth: automated a ~250-hour/month manual reporting workflow into a daily pipeline with QA and data-validation checks, powering client-facing monthly benchmarks across US and UK markets.
- Provided real-time, on-site technical support for the Social Commerce Festival, a live event with 5,000+ TikTok creators: shipped the check-in and creator-tiering platform (TikTok API, Eventbrite webhooks, AI vision) and troubleshoot issues live under pressure, cutting check-in queues from 4 hours to 20 minutes.

### TikTok | Product Manager Intern, Effect Creation Tools Team Jan 2024 – Jun 2024

- Diagnosed failure points across QA, ETL, and model filters to unblock a high-priority effect migration pipeline; partnered with engineering to restructure the data flow, scaling throughput 400x and restoring effect supply for recommendations.
- Launched TikTok's next-gen effect asset library (4,000+ categorized assets) with engineering, design, ops, QA, and legal; gathered creator feedback through interviews and A/B tests, lifting submission penetration 38% and per-user content creation 55%.

### TikTok | Data Analyst Intern, Music User Product Team Aug 2023 – Jan 2024

- Queried and analyzed 5M+ playlist records using SQL and Python, incorporating data profiling and validation checks to ensure accuracy; delivered weekly insights to cross-regional editorial teams, cutting curation time from 4 days to 2 and driving an 18% increase in Weekly Active Users.
- Built self-service Tableau dashboards monitoring KPIs (playlist WAU, average streaming time) with drill-down interactions, improving real-time visibility and reducing ad-hoc data requests by 70%.
- Supported localized "New Release" strategies across five markets with competitor benchmarking (Spotify, Apple Music), contributing to a 20% CTR uplift and a 13% increase in average streaming time.

### ByteDance | Product Operations Intern, Photo & Text Community Team Jan 2023 – Aug 2023

- Designed and iterated content governance systems for creator submissions, using historical moderation data and behavioral drop-off signals to proactively flag low-quality and policy-violating content, cutting high-risk exposure 12% and boosting platform trust metrics.
- Ran creator growth and education programs (traffic support, coaching, submission campaigns) targeted via a standardized evaluation system, lifting submission frequency 10% and vertical view volume 7%.
- Led rollout of single-image submission templates with upstream teams (Xingtutu, Camera, Main App); validated via A/B testing, contributing to a 7% increase in total content volume.

## SKILLS

- **Operations & Support:** User & Product Operations, Technical Troubleshooting, Issue Triage & Follow-Up, Process Improvement, Internal Tool Training & Documentation, Content Governance, Cross-Functional Collaboration
- **Data & Analytics:** SQL (joins, CTEs, window functions), Excel (formulas, pivot tables), Python (pandas, numpy), QA Sampling & Data Validation, Metrics Consolidation, Dashboard Construction, KPI Definition, A/B Testing
- **Platforms & Tools:** Tableau, Power BI, BigQuery, Snowflake, Amplitude, Mixpanel, Data Pipelines
- **AI:** LLM Prompting, AI Agent Development, Retrieval-Augmented Generation (RAG), AI Vision Applications
- **Languages:** English (fluent), Chinese (native)

## EDUCATION

### University of Arizona — Master of Science, Business Analytics May 2025

- **Coursework:** Statistics, Python, Database, Econometrics, Data Mining, Data Visualization, Big Data, Enterprise AI

### Shanghai Business School — Bachelor of Management, Business Administration Jun 2024

### Shanghai University of Finance and Economics — Exchange Program, Business Administration Jun 2023
