SUMMARY

User- and product-operations professional with mobile-video platform experience at TikTok, ByteDance, and a TikTok Shop agency, where I build internal platforms and support their users end to end — responding to inquiries in minutes, resolving most the same day, and turning recurring issues into permanent product fixes — plus training, QA sampling, data validation, metrics consolidation, and dashboard construction. Hands-on with SQL (joins, CTEs, window functions), Excel, and Python (pandas, numpy). Fluent English and native Chinese for cross-regional collaboration.

WORK EXPERIENCE

Outlandish (TikTok Shop Agency) | Senior Data Analyst, Internal Product & User Operations

Sep 2025 – Present

- Build and operate the company's internal platforms — a Creator CRM managing 44,000+ creators, an AI-guided planning tool used across 300+ brands, and the performance-reporting system — plus AI tooling (LLM-based labeling and categorization, AI-vision parsing) that automates manual operations and support work.
- Shipped a fully automated AI meeting-operations pipeline: auto-discovers each brand's weekly client meetings via the Lark Calendar API, pulls official meeting transcripts, uses an LLM to extract summaries and action items as structured JSON, and auto-creates assigned, due-dated tasks in Lark — running every 30 minutes with daily task-status sync-back and tiered retry/backoff.
- Provide frontline support for these platforms as the final resolution point: handle 10–30 inquiries daily — data discrepancies, access and permissions, tool errors, and how-to questions — from internal teams and external creator and brand partners across chat and internal channels, typically responding within minutes and resolving the vast majority same day; follow up to confirm resolution and escalate cross-team issues when needed, with responsiveness repeatedly recognized by users and leadership.
- Review recurring inquiries to drive permanent fixes: when 5 of 30 weekly-report users raised the same request for account-specific layouts, shipped self-service editing (drag-and-drop module ordering, custom modules) that eliminated the request category; replaced error-prone manual GMV/Ads Spend/AOV tracking with automated TikTok API feeds to every brand dashboard, removing a whole class of data errors and saving ~250 hours/month.
- Turned a support backlog into an automated workflow at the Social Commerce Festival (5,000+ TikTok creators): manual GMV lookups for creator tiering left 3,000+ creators unprocessed after two weeks and drew 20+ support tickets over incorrect tiers, so I rebuilt the flow with Eventbrite webhooks + TikTok API to tier creators automatically on registration — then ran real-time on-site support, cutting check-in queues from 4 hours to 20 minutes.
- Drive ticket deflection through SOPs, user guides, and internal training for BD, Operations, Legal, Finance, and regional teams, plus role-based dashboards for self-serve analytics; consolidate metrics into the company's single source of truth with QA and data-validation checks, powering client-facing monthly benchmarks across US/UK markets.

TikTok | Product Manager Intern, Effect Creation Tools Team

Jan 2024 – Jun 2024

- Diagnosed failure points across QA, ETL, and model filters to unblock a high-priority effect migration pipeline; partnered with engineering to restructure the data flow, scaling throughput 400x and restoring effect supply for recommendations.
- Launched TikTok's next-gen effect asset library (4,000+ categorized assets) with engineering, design, ops, QA, and legal; gathered creator feedback through interviews and A/B tests, lifting submission penetration 38% and per-user content creation 55%.

TikTok | Data Analyst Intern, Music User Product Team

Aug 2023 – Jan 2024

- Queried and analyzed 5M+ playlist records using SQL and Python, incorporating data profiling and validation checks to ensure accuracy; delivered weekly insights to cross-regional editorial teams, cutting curation time from 4 days to 2 and driving an 18% increase in Weekly Active Users.
- Built self-service Tableau dashboards monitoring KPIs (playlist WAU, average streaming time) with drill-down interactions, improving real-time visibility and reducing ad-hoc data requests by 70%.

ByteDance | Product Operations Intern, Photo & Text Community Team

Jan 2023 – Aug 2023

- Designed and iterated content governance systems for creator submissions, using historical moderation data and behavioral drop-off signals to proactively flag low-quality and policy-violating content, cutting high-risk exposure 12% and boosting platform trust metrics.

SKILLS

- **Operations & Support:** User & Product Operations, Technical Troubleshooting, Issue Triage & Escalation, Ticket Deflection, SOP & FAQ Development, Process Improvement & Automation, Content Governance, Cross-Functional Collaboration
- **Data & Analytics:** SQL (joins, CTEs, window functions), Excel (formulas, pivot tables), Python (pandas, numpy), QA Sampling & Data Validation, Metrics Consolidation, Dashboard Construction, KPI Definition, A/B Testing
- **Platforms & Tools:** Tableau, Power BI, BigQuery, Snowflake, Amplitude, Mixpanel, Data Pipelines
- **AI:** LLM Prompting, AI Agent Development, Retrieval-Augmented Generation (RAG), AI Vision Applications
- **Languages:** English (fluent), Chinese (native)

EDUCATION

University of Arizona — Master of Science, Business Analytics

May 2025

- **Coursework:** Statistics, Python, Database, Econometrics, Data Mining, Data Visualization, Big Data, Enterprise AI

Shanghai Business School — Bachelor of Management, Business Administration

Jun 2024

Shanghai University of Finance and Economics — Exchange Program, Business Administration

Jun 2023
