SUMMARY

Growth-focused data analyst with experience at TikTok, ByteDance, and a fast-paced TikTok Shop startup agency. Strong in SQL, Excel, and Python on large datasets (5M+ records); defines success metrics, monitors daily campaign performance for anomalies, and builds the measurement and BI tooling behind them. Proven at partnering with engineering teams and external platforms, and at explaining complex findings to executives, clients, and non-technical stakeholders.

WORK EXPERIENCE

Outlandish (TikTok Shop Agency) | *Senior Data Analyst, Creator Operations & Internal Product* Sep 2025 – Present

- Own campaign performance measurement for 300+ brands across US and UK markets: built the company's single-source-of-truth reporting and client-facing monthly benchmarks, defining the success metrics (GMV, video performance, per-campaign P&L) used by the C-suite, account teams, and clients.
- Automated a ~250-hour/month manual reporting workflow into a daily data pipeline with validation checks; monitor daily performance to surface anomalies and metric shifts in brand and creator campaigns for same-day follow-up.
- Designed an AI-guided planning tool that converts historical performance data into each brand's monthly creator strategy and GMV targets, cutting the planning cycle from ~1 month to 7 days across 300+ brands.
- Launched and own Creator CRM managing 44,000+ creators and their campaigns end to end (onboarding, GMV-based tiering, video-performance tracking, campaign P&L), plus a recommendation engine (LLM tagging + GMV-weighted scoring) that turns one-off collaborations into repeat partnerships.
- Integrated external platform and partner data (TikTok API, Eventbrite webhooks, AI vision on GMV screenshots) to ship a check-in and creator-tiering platform for a 5,000+ creator live event, cutting check-in queues from 4 hours to 20 minutes.
- Work directly with the C-suite and across BD, Operations, Legal, Finance, and regional teams; deliver role-based dashboards and internal training on self-serve analytics.

TikTok | *Product Manager Intern, Effect Creation Tools Team* Jan 2024 – Jun 2024

- Diagnosed failure points across QA, ETL, and model filters to unblock a high-priority effect migration pipeline; restructured the data flow, scaling system throughput 400x and restoring effect supply for recommendations.
- Collaborated with engineering, design, ops, QA, and legal to launch TikTok's next-gen effect asset library (4,000+ categorized assets), increasing submission penetration 38% and per-user content creation 55%; validated the value proposition through A/B tests and creator interviews.
- Partnered with AI PMs and ML engineers to define generative-model training datasets for 2D/3D assets; curated benchmark visuals and translated content quality standards into guidance for model output.

TikTok | *Data Analyst Intern, Music User Product Team* Aug 2023 – Jan 2024

- Queried and analyzed 5M+ playlist records using SQL and Python with data profiling and validation checks; delivered weekly insights to cross-regional editorial teams, cutting curation time from 4 days to 2 and driving an 18% increase in Weekly Active Users.
- Drove localized "New Release" strategies across five markets by integrating internal user data with competitor benchmarking (Spotify, Apple Music); partnered with design on UI and content-placement iterations that produced a 20% CTR uplift and a 13% increase in average streaming time.
- Built self-service Tableau dashboards with drill-down interactions to monitor KPIs including playlist WAU and average streaming time, improving real-time data visibility and reducing ad-hoc data requests by 70%.

ByteDance | *Product Operations Intern, Photo & Text Community Team* Jan 2023 – Aug 2023

- Launched growth initiatives (traffic support, creator education, coaching, submission campaigns) targeted through a standardized creator-evaluation system, lifting submission frequency 10% and vertical view volume 7%.
- Used historical moderation data and behavioral drop-off signals to proactively flag low-quality and policy-violating content, cutting high-risk exposure 12%; validated new submission templates via A/B testing with upstream teams, contributing to a 7% increase in total content volume.

SKILLS

- **Analytics & Statistics:** SQL (advanced), Excel (pivot tables, lookups, modeling), Python (pandas, numpy, matplotlib), R, A/B Testing, Hypothesis Testing, Regression & Econometrics, Anomaly Detection, KPI Definition, Experiment Instrumentation
- **Data & BI Tools:** BigQuery, Snowflake, Tableau, Power BI, Amplitude, Mixpanel, Data Pipelines, Data Validation & Profiling
- **Growth & Product:** Campaign Measurement & Reporting, User Segmentation, Funnel Analysis, Roadmap Prioritization, Go-To-Market Strategy, Creator Operations & Ecosystem
- **AI & ML:** LLM Prompting, Retrieval-Augmented Generation (RAG), Embedding Search, AI Agent Development, Training Dataset Curation, Model Evaluation
- **Languages:** English (fluent), Chinese (native)

EDUCATION

University of Arizona — *Master of Science, Business Analytics* May 2025

- **Coursework:** Statistics, Python, Database, Econometrics, Data Mining, Data Visualization, Big Data, Enterprise AI

Shanghai Business School — *Bachelor of Management, Business Administration* Jun 2024

Shanghai University of Finance and Economics — *Exchange Program, Business Administration* Jun 2023
