Outlandish (TikTok Shop Agency) | *Senior Data Analyst & Product Builder, Creator Operations* Sep 2025 – Present

- **Creator ecosystem operations:** own operations for 44,000+ TikTok creators through a Creator CRM built from zero, covering onboarding, GMV-based tiering and segmentation, recruitment, video-performance tracking, and per-campaign P&L; the operating backbone for account and operations teams.
- **Data-backed growth strategy:** designed an AI-guided planning tool that converts campaign performance data into each brand's monthly creator strategy and GMV targets, rolled out across 300+ brands and cutting planning cycles from about 1 month to 7 days; built the company's single source of truth and client-facing monthly benchmarks across US/UK markets to define and track success metrics.
- **Ecosystem health:** built a creator recommendation engine (LLM pain-point tagging plus GMV-weighted scoring) that converts one-off collaborations into repeat, long-term creator relationships; directed creator-facing operations for a 5,000+ creator live event, including training, on-site support, and an automated check-in and tiering platform that cut queues from 4 hours to 20 minutes.
