WORK EXPERIENCE

Outlandish (TikTok Shop Agency) **Sep 2025 - Present**
Senior Data Analyst - AI Development Team *San Francisco Bay Area*

- Own the company's internal platform end to end, shipping 1,600+ merged pull requests to production in 7 months (Laravel/React: ops command center, creator CRM covering 70,000+ creators, TikTok data sync and reporting) through AI-assisted development with engineering review.
- Replaced manual GMV and ad-spend tracking with automated TikTok API data feeds and 60+ validation workflows, eliminating ~250 hours of manual work per month and raising frontline data accuracy from ~70% to 97%.
- Launched an AI planning tool that cut monthly brand planning from ~1 month to 7 days, piloting with account managers before rolling out across 300+ brands; identified recurring user requests from intake data and shipped self-serve report editing, driving that request category to zero.
- Built production AI agents that run daily operations: a meeting pipeline turning client meetings into LLM-extracted summaries and auto-assigned Lark tasks, BD lead intake with self-updating claim cards, and creator outreach with server-verified human approvals; the agent fleet is projected to raise account manager capacity from 1-2 shops to 6-7.
- Automated a 5,000-person creator event's manual tier verification (3,000+ record backlog, 20+ support tickets) with webhooks, TikTok API, and AI-vision checks, cutting check-in from 4 hours to 20 minutes and eliminating the ticket category.
- Serve as final resolution point for 10-30 daily tool and data requests from internal and external users; deliver SOPs, user guides, and training across BD, Operations, Legal, Finance, and US/UK regional teams.

IntelliPro Group **May 2025 - Sep 2025**
Product Manager Intern - AI Sourcing *San Francisco Bay Area*

- Designed and drove a 0-to-1 AI candidate-sourcing tool (raw job description to ranked LinkedIn shortlist), piloted inside IntelliPro's ATS with working recruiters; built with a three-engineer team, reporting to the CTO and CEO.
- Defined evaluation standards for LLM output quality: a weighted six-dimension scoring rubric and golden-standard labeled sets with cross-annotator reconciliation, reaching ~94% nDCG@30 and 98%+ overlap against recruiters' manual top-30 ranking; benchmarked 8+ LLMs on quality vs. cost.

TikTok **Jan 2024 - Jun 2024**
Product Manager Intern - Effect Creation Tools Team *Shanghai*

- Spearheaded a 0-to-1 initiative to build TikTok's next-gen effect asset library, launching 4,000+ categorized assets with engineering, design, ops, QA, and legal, increasing submission penetration by 38% and per-user content creation by 55%.
- Unblocked TikTok's top-priority effect migration pipeline after 6+ months of failure, diagnosing root issues across ETL, QA, and ML filters; rebuilt logic with engineering and scaled throughput 400x, restoring effect supply to the recommendation system.

TikTok **Aug 2023 - Jan 2024**
Data Analyst Intern - Music User Product Team *Shanghai*

- Queried and analyzed over 5M playlist records using SQL and Python with profiling and validation checks; delivered weekly insights to cross-regional editorial teams, reducing curation time from 4 days to 2 and driving an 18% increase in Weekly Active Users.
- Built self-service Tableau dashboards monitoring key KPIs (playlist WAU, average streaming time) with drill-down interactions, improving real-time visibility and reducing ad-hoc data requests by 70%.

ByteDance **Jan 2023 - Aug 2023**
Product Operation Intern - Photo & Text Community Team *Shanghai*

- Launched growth initiatives (traffic support, creator education, submission campaigns) targeting high-quality creators identified via a standardized evaluation system, lifting submission frequency 10% and vertical view volume 7%.
- Designed and iterated content governance systems for creator submissions, using historical moderation data and behavioral drop-off signals to proactively flag low-quality and policy-violating visuals, cutting high-risk exposure by 12%.

SKILLS

- **AI & Automation**: AI Agent Development & Operations, LLM Workflow Automation, Prompt Engineering, LLM Evaluation (rubrics, golden-standard sets, nDCG), LLM Labeling & Categorization, RAG, AI Vision, AI-assisted Coding (Claude), Model Selection & Cost Optimization
- **Internal Tools & Product**: Workflow Automation, REST APIs & Webhooks, Lark/Feishu Open API, Engineering-ready Spec Writing, Roadmap Prioritization, SOP Development, Issue Triage & Ticket Deflection, User Training & Enablement
- **Data & Analytics**: SQL (joins, CTEs, window functions), Python (pandas, numpy), Excel, Tableau, Power BI, BigQuery, Snowflake, Amplitude, Mixpanel, KPI Definition, Data Validation & QA Sampling, A/B Testing
- **Languages**: English (fluent), Mandarin Chinese (native)

EDUCATION

University of Arizona **May 2025**
Master of Science, Business Analytics

Shanghai Business School **Jun 2024**
Bachelor of Management, Business Administration

Shanghai University of Finance and Economics **Jun 2023**
Exchange Program, Business Administration
