SUMMARY

AI product builder with hands-on LLM evaluation depth: designed weighted scoring rubrics and golden-standard labeled sets with cross-annotator calibration, ran nDCG-based offline evaluations and 8-model quality/cost benchmarks, and ship automated LLM workflows used daily in production operations. Earlier TikTok/ByteDance experience includes defining generative-model training datasets and content quality standards. Strong SQL and Python; native Chinese and fluent English for global, cross-time-zone collaboration.

WORK EXPERIENCE

Outlandish (TikTok Shop Agency) | *Senior Data Analyst & AI Product Builder* Sep 2025 – Present

- **AI products in production:** own an internal AI product portfolio used daily across 300+ brands and 44,000+ creators — an AI-guided planning tool (planning cycle ~1 month → 7 days), a Creator CRM, and a recommendation engine that uses LLM labeling/categorization of creator pain points with GMV-weighted scoring.
- **Automated LLM workflows:** shipped a fully automated pipeline turning every brand's weekly client meetings into LLM-extracted structured summaries and auto-assigned Lark tasks (strict JSON schema with validation, daily status sync-back); built Lark Daily Digest for the C-suite (open-sourced: github.com/bellehe01/lark-daily-digest), an AI triage tool classifying every group chat by urgency; deployed AI-vision parsing that replaced manual data verification.
- **Data quality & QA:** consolidate metrics into the company's single source of truth with QA sampling and data-validation checks; automated error-prone manual tracking with TikTok API feeds, eliminating an entire error class and ~250 hours/month; analyze usage data to prioritize each product iteration.
- **Global cross-functional delivery:** work directly with the C-suite and coordinate BD, Operations, Legal, Finance, and US/UK regional teams across time zones; deliver role-based dashboards, SOPs, and internal training.

IntelliPro Group | *Product Manager Intern, AI Sourcing* May 2025 – Sep 2025

- **0 → 1 AI product:** designed and drove an AI candidate-sourcing tool — raw job description to a ranked, scored LinkedIn shortlist — piloted inside IntelliPro's ATS and tested by working recruiters; built with a three-engineer team reporting directly to the CTO and CEO; architected as a multi-agent LLM pipeline with dedicated skill/seniority/location agents to counter accuracy decay on long, multi-objective prompts.
- **LLM evaluation & labeling standards:** designed a weighted six-dimension scoring rubric and wrote the scoring prompts; built golden-standard sets — 30 candidates per job, graded 1–5 per dimension, labeled independently by me and a recruiter then reconciled — and ran offline evals: rubric-guided GPT-4 reached ~94% nDCG@30, with 98%+ overlap against recruiters' manual top-30 ranking across 5 JDs.
- **Model selection & cost:** benchmarked 8+ LLMs (GPT-4/4.1/5, Gemini 2.5, DeepSeek V3/R1, Qwen 3) on quality vs. cost, landing ~\$4–8 per JD with an optimization path to ~\$0.0075 per candidate.

TikTok | *Product Manager Intern, Effect Creation Tools Team* Jan 2024 – Jun 2024

- **Model training data:** partnered with AI PMs and ML engineers to define generative-model training datasets for 2D/3D assets; curated benchmark visuals, built prompt libraries, and translated content quality standards into labeling guidance for model output.
- **0 → 1 creative product:** drove TikTok's next-gen effect asset library — 4,000+ categorized assets launched with engineering, design, ops, QA, and legal — lifting submission penetration 38% and per-user content creation 55%; validated via A/B tests and creator interviews.

TikTok | *Data Analyst Intern, Music User Product Team* Aug 2023 – Jan 2024

- Analyzed 5M+ playlist records with SQL/Python using profiling and validation checks; weekly insights cut curation time from 4 days to 2 and drove an 18% WAU increase; self-service Tableau dashboards reduced ad-hoc data requests by 70%.

ByteDance | *Product Operations Intern, Photo & Text Community Team* Jan 2023 – Aug 2023

- Built a standardized creator-evaluation system and content-governance flagging on moderation data and behavioral signals, cutting high-risk content exposure 12% and lifting submission frequency 10%.

SKILLS

- **AI & LLM:** LLM Evaluation (nDCG, golden-standard sets, rubric design), Inter-annotator Calibration, Prompt Engineering, Multi-Agent LLM Systems, Model Selection & Cost Optimization, LLM Labeling & Categorization, Training-Dataset Curation, AI Vision, RAG
- **Data & Analytics:** SQL (joins, CTEs, window functions), Python (pandas, numpy), Excel, QA Sampling & Data Validation, KPI Definition, A/B Testing, Dashboard Construction
- **Product & Delivery:** 0-to-1 Product Development, Roadmap Prioritization, Project & Timeline Management, Workflow Automation, Global Stakeholder Management, SOP Development
- **Tools:** BigQuery, Snowflake, Tableau, Power BI, Lark/Feishu (incl. Open API integrations), Amplitude, Mixpanel
- **Languages:** English (fluent), Chinese (native)

EDUCATION

University of Arizona — *Master of Science, Business Analytics* May 2025

- **Coursework (all A/A+):** Statistics, Python, Database, Econometrics, Data Mining, Data Visualization, Big Data, Enterprise AI

Shanghai Business School — *Bachelor of Management, Business Administration* Jun 2024

Shanghai University of Finance and Economics — *Exchange Program, Business Administration* Jun 2023
