SUMMARY

Internal tools and data product builder: I find where manual, spreadsheet-driven work is slowing teams down and turn it into shipped fixes: automated data feeds, self-serve dashboards trusted by execs, and workflow automation that replaces manual coordination. I ship production code directly with SQL, REST APIs and webhooks, and AI-assisted coding (1,600+ merged pull requests in the past 7 months), or write engineering-ready specs for hand-off. Measured in outcomes: ~250 hours per month of manual reporting eliminated, frontline data accuracy up from ~70% to nearly 97%, entire support-ticket categories eliminated. Based in San Francisco.

WORK EXPERIENCE

Outlandish (TikTok Shop Agency) | ***Senior Data Analyst, AI Development Team*** **Sep 2025 – Present**

- **Shipped deliverables, not recommendations:** 1,600+ merged pull requests in 7 months into the company's production platform (Laravel and React: internal ops command center, creator CRM, TikTok data sync, reporting layer) and its AI agent console, written with AI-assisted coding and reviewed by engineering before merge.
- **Internal tools and data product portfolio:** own the internal systems used daily across 300+ brands and 70,000+ creators: a 0-to-1 creator CRM that became the operating backbone for account and ops teams, an AI planning tool that cut the monthly planning cycle from ~1 month to 7 days (piloted with account managers, then company-wide), and the single-source-of-truth metrics layer behind role-based dashboards and client-facing monthly benchmarks (US/UK).
- **Reporting automation and data quality:** replaced manual performance tracking (account executives hand-copying GMV, ad spend, and AOV into spreadsheets, with frequent errors) with automated TikTok API feeds into live brand dashboards, eliminating an entire error class and ~250 hours of manual work per month; built and maintain 60+ validation and follow-up automations that raised frontline data accuracy from ~70% to nearly 97%.
- **Workflow automation, end to end:** shipped a fully automated meeting-operations pipeline (calendar discovery, LLM-extracted summaries and action items, auto-assigned Lark tasks with daily status sync-back) that replaced manual coordination; automated a 5,000-person event's manual GMV-tier verification (3,000+ record backlog, 20+ support tickets) with webhook and API auto-tiering plus AI-vision checks, cutting check-in from 4 hours to 20 minutes and eliminating that ticket category.
- **AI agents in production:** build and operate AI agents that run daily operations, including BD lead intake that turns each new lead into a self-updating Lark card with one-click claim, and creator outreach with human-in-the-loop approvals; built Lark Daily Digest for the C-suite, an AI agent that triages every group chat by urgency into a daily brief (open-sourced: github.com/bellehe01/lark-daily-digest).
- **Build-direct vs. hand-off judgment:** prototyped a heavyweight LLM+RAG matching approach for two weeks, then deliberately chose a lightweight LLM pain-point-labeling design; the resulting creator-brand recommendation engine lifted account managers' capacity from 1 to 2-3 brands each. Also built a RAG proposal assistant that cut drafting from ~2 hours to 15 minutes for a 5-person BD team.
- **Intake, triage and user-driven roadmap:** handle 10-30 tool and data requests daily from internal (AM, Ops, Finance) and external users with same-day resolution; run recurring-issue reviews that feed the tooling roadmap: spotted 5 of 30 users filing the same reporting request and shipped self-serve report editing that drove the category to zero; deliver SOPs, user guides, and training across BD, Ops, Legal, Finance, and US/UK teams.

IntelliPro Group | ***Product Manager Intern, AI Sourcing*** **May 2025 – Sep 2025**

- **0-to-1 internal tool:** designed and drove an AI candidate-sourcing tool (raw job description to a ranked LinkedIn shortlist), piloted inside IntelliPro's ATS and tested by working recruiters; built with a three-engineer team, reporting directly to the CTO and CEO.
- **Defining metrics that stick:** defined what "good" means and made it measurable: a weighted six-dimension scoring rubric, golden-standard labeled sets built with cross-annotator reconciliation, and offline evaluations reaching ~94% nDCG@30 with 98%+ overlap against recruiters' manual top-30 ranking; benchmarked 8+ LLMs on quality vs. cost.

TikTok | ***Product Manager Intern, Effect Creation Tools Team*** **Jan 2024 – Jun 2024**

- Drove a 0-to-1 internal asset library (4,000+ categorized assets) launched with engineering, design, ops, QA, and legal, lifting submission penetration 38% and per-user content creation 55%; validated via A/B tests and user interviews.

TikTok | ***Data Analyst Intern, Music User Product Team*** **Aug 2023 – Jan 2024**

- Built the team's self-service Tableau dashboards and defined their metric conventions, cutting ad-hoc data requests by 70%; analyzed 5M+ playlist records with SQL and Python; weekly insights drove an 18% WAU increase and cut curation cycle time from 4 days to 2.

ByteDance | ***Product Operations Intern, Photo & Text Community Team*** **Jan 2023 – Aug 2023**

- Built a standardized creator-evaluation system and content-governance flagging on moderation data, cutting high-risk content exposure 12%.

SKILLS

- **Internal Tools & Automation:** Workflow Automation, REST APIs & Webhooks, AI-assisted Coding (Claude), Lark/Feishu Open API integrations (Calendar/VC/Tasks/IM), Engineering-ready Spec Writing, SOP Development, Issue Triage & Ticket Deflection
- **Data & Analytics:** SQL (joins, CTEs, window functions), Python (pandas, numpy), Excel, KPI Definition, Data Validation & QA Sampling, Dashboard Construction, Funnel & Cohort Analysis, A/B Testing
- **AI & LLM:** AI Agent Development & Operations, LLM Workflow Automation, Prompt Engineering, LLM Labeling & Categorization, LLM Evaluation (rubrics, golden-standard sets, nDCG), RAG, AI Vision, Model Selection & Cost Optimization
- **Tools:** BigQuery, Snowflake, Tableau, Power BI, Amplitude, Mixpanel; HTML/JavaScript (working knowledge)
- **Languages:** English (fluent), Chinese (native)

EDUCATION

University of Arizona — *Master of Science, Business Analytics* **May 2025**

- **Coursework (all A/A+):** Statistics, Python, Database, Econometrics, Data Mining, Data Visualization, Big Data, Enterprise AI

Shanghai Business School — *Bachelor of Management, Business Administration* **Jun 2024**

Shanghai University of Finance and Economics — *Exchange Program, Business Administration* **Jun 2023**
