SUMMARY

AI product builder with a data-analytics core, shipping 0-to-1 products at a fast-paced TikTok Shop agency — an AI planning tool, creator CRM, recommendation engine, and event platform — from problem scoping through launch and post-launch measurement. Former TikTok PM on creative tools. Strong SQL and Python; runs pilots and A/B tests, scopes third-party integrations, and communicates fluently with engineers, executives, and clients.

WORK EXPERIENCE

Outlandish (TikTok Shop Agency) | AI Product Builder & Senior Data Analyst, Internal Product Sep 2025 – Present

- Own the internal product portfolio end to end — planning tools, CRM, recommendation engine, and event platform — scoping problems independently with business teams, defining requirements, partnering with engineering, and measuring KPI impact post-launch.
- Designed and launched an AI-guided planning tool that turns campaign performance data into each brand's monthly creator strategy and GMV targets; piloted with a small group of Account Managers, iterated on their feedback, then rolled out across 300+ brands, cutting the planning cycle from ~1 month to 7 days.
- Launched and own Creator CRM, a 0-to-1 product managing 44,000+ creators and their brand campaigns end to end (onboarding, GMV-based tiering, video-performance tracking, per-campaign P&L), now the operating backbone for account and operations teams.
- Built a creator recommendation engine (LLM pain-point tagging + GMV-weighted scoring) that surfaces proven creators for each brand, replacing manual cross-channel search and turning one-off collaborations into repeat, long-term partnerships.
- Scoped and shipped third-party integrations (TikTok API, Eventbrite webhooks, AI vision on GMV screenshots) for a check-in and creator-tiering platform serving a 5,000+ creator live event, cutting check-in queues from 4 hours to 20 minutes.
- Built the company's single-source-of-truth performance reporting across US/UK markets; automated a ~250-hour/month reporting workflow into a daily pipeline and deliver role-based dashboards to C-suite, BD, Operations, Legal, and Finance.

TikTok | Product Manager Intern, Effect Creation Tools Team Jan 2024 – Jun 2024

- Spearheaded a 0-to-1 initiative to build TikTok's next-gen effect asset library — a creative workflow product for effect creators — launching 4,000+ categorized assets with engineering, design, ops, QA, and legal; lifted submission penetration 38% and per-user content creation 55%. As PMF owner, refined the value proposition through A/B tests and creator interviews.
- Unblocked a high-priority effect migration pipeline by diagnosing failure points across QA, ETL, and model filters; restructured the data flow, scaling throughput 400x and restoring effect supply for recommendations.
- Partnered with AI PMs and ML engineers to define generative-model training datasets for 2D/3D assets; curated benchmark visuals and translated content quality standards into guidance for model output.

TikTok | Data Analyst Intern, Music User Product Team Aug 2023 – Jan 2024

- Queried and analyzed 5M+ playlist records using SQL and Python with data profiling and validation checks; delivered weekly insights that cut curation time from 4 days to 2 and drove an 18% increase in Weekly Active Users.
- Drove localized "New Release" strategies across five markets by combining internal user data with competitor benchmarking (Spotify, Apple Music); partnered with design on UI and content-placement iterations that produced a 20% CTR uplift and 13% longer average streaming time.
- Built self-service Tableau dashboards monitoring KPIs (playlist WAU, streaming time), improving real-time visibility and reducing ad-hoc data requests by 70%.

ByteDance | Product Operations Intern, Photo & Text Community Team Jan 2023 – Aug 2023

- Launched growth initiatives (traffic support, creator education, coaching, submission campaigns) targeted through a standardized creator-evaluation system, lifting submission frequency 10% and vertical view volume 7%.
- Led rollout of single-image submission templates with upstream teams (Xingtutu, Camera, Main App); validated via A/B testing, improving submission penetration and contributing to a 7% increase in total content volume.

SKILLS

- **Product:** 0-to-1 Product Development, Roadmap Prioritization, PRDs & Requirements, Pilot Program Design, A/B Testing & Experimentation, User Interviews, Go-To-Market Strategy, Third-Party Integration Scoping, Agile
- **Analytics:** SQL (advanced), Python (pandas, numpy, matplotlib), Excel, R, KPI Definition, Experiment Instrumentation, Funnel & Cohort Analysis, Hypothesis Testing, Regression & Econometrics
- **Data & BI Tools:** BigQuery, Snowflake, Tableau, Power BI, Amplitude, Mixpanel, Data Pipelines, Data Validation & Profiling
- **AI & ML:** LLM Prompting, Retrieval-Augmented Generation (RAG), Embedding Search, AI Agent Development, AI Vision Applications, Training Dataset Curation, Model Evaluation
- **Languages:** English (fluent), Chinese (native)

EDUCATION

University of Arizona — Master of Science, Business Analytics May 2025

- **Coursework:** Statistics, Python, Database, Econometrics, Data Mining, Data Visualization, Big Data, Enterprise AI

Shanghai Business School — Bachelor of Management, Business Administration Jun 2024

Shanghai University of Finance and Economics — Exchange Program, Business Administration Jun 2023
